MEGA THERMAL RANGE

MT75

THE ONLY SOLUTIONS FOR EMBARRASSING WASTE AND COMPACTOR ODOURS, TARGETS THE ODOUR SOURCE

REMOVE ODOURS, CONTROL INFECTION & IMPROVE HYGIENE

- Stops odours at their source
- Reduces harmful viruses
- Breaks down unwanted bacteria
- Stops Mould and fungi growth
- Works in the toughest environments
- No chemical residue or moisture after treatment
- Prevents customer complaints
- Lifts visitors perception of cleanliness
- Low maintenance, clean and lamp change once a year

› ODOUR PROBLEMS

Environmental Protection legislation makes it an offence to manage waste in a manner likely to cause harm to human health or the environment, this include offence to the senses. Businesses that have onsite compactors to manage their waste are all subject to odour control regulations.

Cleaning, filtration and chemical dosing cannot control the source of the odours whilst masking odours with strong fragrances will only have a limiting effect. In just 8 hours one bacteria can multiply to 8 million*, left uncontrolled this further breaks down waste and magnifies the odour issues. Attempting to mask these odours will simply not work and can make the environment much more unpleasant with the combination of bacteria waste odours, rotting matter and fragrances.

*Certain bacteria such as Ecoli can replicate every 20 minutes, which could in theory leave you with 16.7 million in 8 hours, what we are highlighting is that bacteria breed very quickly and cannot be controlled with traditional methods.

› BENEFITS OF USING LIVVAir's AIRSTERIL® MT75

› Control odours 24/7
› Eliminates need for fragrances
› Improves environment for all
› Eliminates customer complaints

› PERFECT FOR USE

› Above large waste compactors
› In large bin store rooms
› Persistent extreme odour areas
› Waste processing areas
